Land Management System

This Software specially designed for societies and all those who doing the business on Land (property) to manage/know the Land owners which land we want to purchase and after purchase manage the overall land. Over software tell you about even one square feet of land. The feature of this software is this.

➤ Software interfaces

- By Map on internet

❖ On Map we will show the map with colors effect so it is very easy to know whose land part we have fully purchase and whose land part we have partially purchase and whose land part we have know the owners from which we can purchase the land. Map on internet is automatically changed with changing in software. By use of internet you can see status Of khasra, Moza and members area anywhere.

- By software

➤ Software Functionality

Separate Screen for

- Land Record case
- Land Purchase case
- Land Sale case
- Land Virasat case
- Inquiries
- Reports

➤ Record of all Moza by name

- In software we record all Moza by their name.

➤ Details of Khasra.

- In every Moza we can record their all khasra and their Total area (Kinal, Marla, Square feet's).
- You can also now that in a Khasra you purchase how many area and how the area is left to purchase even a single square feet.
- In software We can see all khasra by their status means Separate status for available, partially purchase and fully purchase.
